

Summer Tucker

Education

Willamette University

M.S. in Data Science (Expected graduation May 2027)

B.A. Environmental Science, Minor in Economics, Graduated 2013

Career Summary

Research analyst with extensive background in public policy analysis and Oregon's workers' compensation system.

Skills and expertise

- ❖ Proficiency in PostgreSQL, R, Python, Grafana, and Airflow to facilitate all aspects of the data science pipeline (data collection, warehousing, data analysis, and statistical modeling).

Experience

Project Analyst (Research Analyst 3)

Oregon Department of Consumer & Business Services (DCBS), Central Services Division

April 2026 – Present

- ❖ Provide data analysis and research expertise to department program areas.
 - Create SQL database queries, write R programs to query and analyze data, and complete statistical analysis. Troubleshoot and update existing code while creating new programs for new tasks.
 - Design and implement research methodologies and apply analytical techniques.
 - Identify and interpret trends, determine limitations and caveats to findings. Present findings in a manner that is digestible for non-technical audiences.
- ❖ Collaborate and strategize with internal stakeholders to tackle their research and data requests, both through clarifying and refining their questions, and through completing the technical work to produce findings.
- ❖ Create deliverables (reports, spreadsheets, visualizations, etc.) for internal stakeholders that are used to inform public policy decisions, conduct regulatory or compliance work, support other operational work, or respond to public records requests.

Claim Processing and Return to Work Policy Analyst

Oregon Department of Consumer & Business Services (DCBS), Workers' Compensation Division (WCD)

May 2021 – April 2026

- ❖ Clarified, improved, streamlined, and revised workers' compensation administrative rules to serve the needs of the workers' compensation system and address problems raised by stakeholders.
 - Facilitated five rulemakings on a wide range of claims processing and return to work issues since 2021.
 - Produced summarized issue narratives for every rulemaking to brief stakeholders on the issues, recommend solutions, and present supporting data. Facilitated public rulemaking meetings to engage a diverse range of stakeholder groups (e.g., workers, employers, insurers, vocational providers).
 - Adopted rule revisions have included implementing legislation, expanding access to vocational assistance benefits, and clarifying claim processing requirements.
 - Managed the backlog of claim processing and vocational assistance rule issues and have

eliminated over 100 outstanding and new issues logged from 2007-2025.

- ❖ Monitored and analyzed legislation to identify any impact on Oregon's workers' compensation system, along with WCD's policies or processes. Developed legislative concepts for WCD to address regulatory issues. Prioritized time-sensitive legislative analysis while Oregon legislature is in session.
 - Produced clear narrative analyses to explain the effects of any proposed legislation so they could be understood by a wide range of stakeholders and legislators.
 - During the 2025 legislative session, monitored over 30 bills.
 - Successfully developed a legislative concept and authored a bill that was passed in the 2025 legislative session.
- ❖ Coordinated with agency research analysts to gather and analyze data to explore or support regulatory changes, and project the impact of proposed changes on the workers' compensation system.
- ❖ Provided ad hoc research, analysis, and advice to WCD management or WCD staff to inform policy decisions and action. Served as consultant and resource for internal stakeholders and subject matter experts on individual issues, claims, or questions. Advised on application of complex workers' compensation laws and rules.
- ❖ Researched and responded to external stakeholder inquiries on workers' compensation laws and policies.
- ❖ Analyzed technical case decisions from the Oregon courts and Workers' Compensation Board. Determined the impact of these decisions on WCD's administrative rules and collaborated with internal stakeholders to initiate rule or operational process changes as needed.
- ❖ Presented to stakeholders on workers' compensation topics and facilitated feedback at public stakeholder meetings. Produced issue documents to inform participants on the issues, background, and possible solutions.

Compliance Specialist 2 – Auditor

Oregon Department of Consumer & Business Services (DCBS), Workers' Compensation Division (WCD)
Oct. 2017 – May 2021

- ❖ Conducted regulatory compliance audits of the workers' compensation industry. Audited approximately 1,000 claims per year. Audits conducted included annual claims processing performance audits (timeliness of benefit payments and processing actions), and the temporary disability accuracy audit (accuracy of temporary disability and weekly wage calculations).
- ❖ Effectively communicated with insurers and service companies throughout the audit process both verbally and in writing.
- ❖ Created audit reports by analyzing and interpreting audit findings. Communicated the findings in written and verbal form. Made recommendations for corrective action(s) as needed, including the assessment of penalties.
- ❖ Prepared and delivered training presentations to workers' compensation insurers and service companies.
- ❖ As a lead worker, coordinated the focused temporary disability audit program. Designated and assigned work to auditors. Provided training and technical guidance to monitor and evaluate work of other team members for quality control, sufficiency, and accuracy.
